

Technical Talk

Hong Kong Conduit Condition Evaluation Codes 2009 (The Code of Practice on Conduit Condition Evaluation using CCTV in H.K. of Slope Safety Improvement)

Jointed seminar with HKIUS, SOE (HK), ICE(HK), CIOB & InstMC

Date, Time & Venue

10th June (Wednesday), 2009. IVE(Haking Wong) Lecture Theatre at 19:00 for 20:00

Programme Highlights:

Good practice and strategic standardisation of the coding system are the principal drivers to ensure that water supplies, sewerage and drainage assets continue to be fit-for-purpose and cost-effective. Materials and products specifications, quality assurance systems, certification programs, design and construction codes, and competency-based training schemes will support and form a total package of standard practices of the industry that can help Hong Kong's water supply, sewerage and drainage industries to deliver quality services.

The Code of Practice for Conduit Condition Evaluation Using CCTV in Hong Kong will provide a valuable standardising and stabilising influence on the approach to conduit condition evaluation at a time when Hong Kong's water supplies, sewerage and drainage industries embark on a beginning to focus on asset management and asset maintenance as a stand-alone discipline

Speaker:

Ir Dr. King Wong,

Immediate Past Chairman of HKIE-SSC

Chairman of Qualification and Membership and Mediation Committee, HKIUS

The Author of the HKCCEC.
